***Detailed Action***

The following is responsive to Applicant's request for consideration received May 2, 2003.

No claims are cancelled. No new claims are added. Claims 31-34 are currently pending.

Applicant's remarks with respect to claim 33 have been considered. The withdrawal of claim 33 was inadvertent. Thus, a complete action on the merits including claim 33 is provided below.

Concerning Applicant's arguments that the rejection under 35 USC 103(a) set forth in paragraphs 2-4 of the office action mailed Feb. 4, 2003 should be withdrawn in view of Applicant's request to extend priority under 35 USC 120 to USAN 09/220,813, the Examiner respectfully submits that in order to perfect priority, Applicant must amend the specification to refer to the earlier filed application. If applicant desires priority under 35 U.S.C. 120 based upon a previously filed application, specific reference to the earlier filed application must be made in the instant application. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. \_\_\_\_" should follow

Art Unit: 1614

the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director

Art Unit: 1614

may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

In view of the above, the following rejection including claim 33 is submitted.

***Claim Rejection—35 USC 103***

I. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

II. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

1. Claims 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allgeier et al., WO 99/02497.

Allgeier et al. disclose methods for treating nervous system disorders mediated by mGluR5, such as anxiety. The methods comprise administering effective amounts (0.5 to 100 mg; humans 5 to 1500 mg) of pyridine derivatives represented by Formula (1), wherein "X" is a lower alkenylene group or a lower alkynylene group, R5 is pyridine or phenyl and R1-R5; Ra-d are as defined at pages 3-5. One preferred compound is 2-[2-{Pyridin-3-yl)ethynyl]-6-methyl-pyridine. Please see pages 3-5; page 2, lines 5-9; page 7, lines 1-8; page 21, the 15th compound.

Allgeier et al. do not specifically disclose administering Applicant's claimed compound 2-[2-{Pyridin-3-yl)ethenyl]-6-methyl-pyridine; however, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the ethynyl group to an ethenyl group as claimed by Applicant because Allgeier et al. teach that for substituent "X" there may be either a lower alkenylene or alkynylene group. Therefore, one of ordinary skill in the art would reasonably expect 2-[2-{Pyridin-3-yl) ethenyl]-6-methyl-pyridine to be equally effective in treating anxiety.

Moreover, the claims of the instant application differ by reciting a specific species than the reference. Yet, it would have been obvious to one of ordinary skill in the art at the time the invention was made to select any species of the genus taught by Allgeier et al., including those of the claims, because an ordinary artisan would have the reasonable expectation that any of the species of the genus would have similar properties and, thus, the same use as the genus as a whole. In other words, one of

Art Unit: 1614

ordinary skill in the art would reasonably expect any of the species of the genus to be capable of treating anxiety.

### ***Claim Objections***

Claim 33 is objected to because of the following informalities: in claim 33, line 17, there should be a --,-- between "chlorine" and "bromine". Appropriate correction is required.

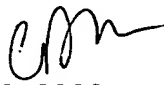

### ***Conclusion***

Claims 31-34 are rejected.
